

Mahesh Krishna P

maheshkrishnap.mec@gmail.com | [linkedin.com/in/mahesh-krishnap](https://www.linkedin.com/in/mahesh-krishnap) | mahesh-kri.github.io/portfolio-site | Dublin, Ireland
Visa status: Irish Stamp 2 (non-EU student, TU Dublin) — currently eligible to work; eligible to convert to Stamp 1G (full work authorisation, no employer sponsorship required) upon graduation

EDUCATION

TU Dublin – Tallaght Campus

MSc Computing (Development Operations)

Dublin, Ireland

Sept. 2026 – Expected 2027

Govt. Model Engineering College (APJ Abdul Kalam Technological University)

B.Tech, Computer Science and Engineering – CGPA 7.79/10

Kochi, India

May 2020 – June 2024

EXPERIENCE

Software Development Engineer 1

Jul. 2024 – Jul. 2026

Hatio Innovations

Kochi, India

- Built a fault-tolerant Kafka event pipeline with dead-letter queue, retry, and idempotency handling across order, payment, and notification flows, ensuring reliable processing with zero silent data loss
- Implemented a full authentication stack (Spring Security, JWT, 2FA, RBAC) for multi-tenant onboarding with isolated permission scopes
- Replaced DOM-based parsing with a streaming SAX algorithm, cutting processing latency by 75% on high-volume financial reporting files
- Built a multithreaded batch pipeline (@Async, TaskExecutor, CompletableFuture), achieving 55% faster delivery across 2-5 enterprise clients
- Used Aerospike for caching and Oracle/SQL for relational storage, reducing load on high-traffic read paths
- Owned database schema and system architecture design during solutioning sessions; worked cross-functionally to ship features safely in a fast-changing product environment

Project Intern (Technical Internship)

Jan. 2024 – Jul. 2024

SunTec Business Solutions

Trivandrum, India

- Built and enhanced REST APIs on Xelerate, a production fintech platform used by banks, working across pricing, billing, and platform teams on live requirements
- Handled testing and debugging with JUnit and Mockito, catching defects before release across a financial product
- Got hands-on exposure to Jenkins CI/CD pipelines, coordinating with the DevOps team on build and release issues

PROJECTS

Retail-OS – Full-Stack Retail Management Platform | Spring Boot, Next.js, Live in Production

Mar. 2026

- Designed and shipped a production system for an active retail business, including real-time billing, inventory, and customer CRM, built end-to-end with Spring Boot and Next.js

TECHNICAL SKILLS

Languages: Java, SQL, Python

Backend: Spring Boot, Spring Security, REST API Design, Hibernate/JPA

Auth & Security: JWT, 2FA, RBAC, Multi-Tenant Access Control

Messaging & Events: Apache Kafka (producers/consumers, DLQ, retry, idempotency), Microservices

Concurrency: CompletableFuture, ExecutorService, Multithreading, Async Processing

Data Stores: Aerospike (caching), Oracle, SQL, Relational Database Design

Testing: JUnit 5, Mockito

Build & CI/CD: Maven, Docker, GitLab CI

Practices: Agile Development, Fintech/Financial Systems
