About Me

Backend Engineer (Java / Spring Boot) with 2+ years of experience building event-driven, high-throughput systems. Proven track record of reducing report processing times by ~75% via SAX parser optimization, architecting resilient Kafka pipelines with DLQ and idempotency handling, and automating end-to-end financial reconciliation—currently transitioning into Senior/SDE-II roles focused on scalable infrastructures.

Experience

Hatio Innovations Pvt Ltd – Kochi, India

July 2024 – present

Software Development Engineer

- ◆ Architected Kafka topic/partition layout with DLQ, retry, and idempotency handling for order, payment, and notification flows — designed for 1L+ daily transactions.
- ◆ Replaced DOM-based Excel parsing with SAX parser, cutting memory usage and processing time by ~75% on lakh-row production files.
- ◆ Built multithreaded batch pipeline (Spring @Async, TaskExecutor, CompletableFuture) for parallel report generation — ~55% faster delivery across 2–5 enterprise clients.
- ◆ Implemented full auth stack (Spring Security, JWT, 2FA, RBAC) for multi-tenant onboarding with isolated permission scopes.

Suntec Business Solutions – Kochi, India

Jan 2024 – July 2024

Project Intern

- ◆ Built and enhanced REST APIs on a fintech product using production Java codebases; applied functional programming patterns for cleaner code.
- ◆ Handled testing and debugging across features using JUnit and Mockito.

Education

Govt Model Engineering College – Kerala, India

May 2020 – June 2024

B.Tech- in Computer Science Engineering

CGPA: 7.79 / 10

Projects

Retail-OS

March 2026

- ◆ Full-stack retail management platform live in production for a client covers inventory, POS billing, customer CRM, referral loyalty, and WhatsApp automation.
- ◆ Built with Spring Boot (backend) and Next.js (frontend); handles real-time billing and customer data for an active retail business.

Technical Skills

Backend: Java 17, Spring Boot, Spring Security, REST APIs, Microservices, Hibernate/JPA, CompletableFuture, ExecutorService

Messaging & Streaming: Apache Kafka (topic/partition design, producers/consumers, DLQ, retry, idempotency)

Data Processing: Apache POI, Apache Camel, SAX Parser, Batch Processing, Multithreading

Auth & Security: JWT, Spring Security, 2FA, RBAC

Databases & Caching: Aerospike, Oracle, SQL

Testing: JUnit 5, Mockito

Build & Deployment: Maven, Docker, GitLab CI, AWS, Jenkins

Version Control: Git, GitLab
